

**Healthy Investment  
Ethical With-profits Fund  
Investment Bulletin  
Junior ISA (series 1)**

**31<sup>st</sup> December 2022**

This factsheet must be read in conjunction with the Key Information Document and Terms and Conditions of your Junior ISA. Nothing in this document constitutes financial advice.

## Fund objective

Healthy Investment's Ethical With-profits Fund aims to provide members with steady growth through a cautious, actively managed fund over the medium to long term.

We offer investors an opportunity to invest in our Ethical With-profits Fund which includes a mix of different assets including government and corporate bonds, UK and global shares, commercial property and cash deposits, which otherwise might be difficult to achieve as a direct individual investor.

To maximise the potential return, the stocks and shares, commercial property and fixed interest bonds in the Ethical With-profits Fund are professionally and actively managed. We ensure that we use the best external fund managers who have the skills and expertise in each asset class to seek every opportunity for growth whilst only exposing the Society to an acceptable level of risk.

Our Ethical With-profits Fund does not invest directly in companies in the alcohol, tobacco and arms industries and gambling and pornography providers. As an ethical provider we use our votes at the AGMs of companies whose shares we hold to promote the highest standards of corporate governance, environmental protection and social responsibility.

## Features of the Junior ISA

- Capital and Bonus Guarantees. On the child's 18th birthday, or any subsequent 5th birthday, for all investments held over 5 years, the ISA will not be subject to any market value reduction that might be applied, which means that the child is guaranteed to receive all of your initial investment, less any withdrawals already made, plus all of the bonuses added, irrespective of market conditions, if the child withdraws from ISA on one of these anniversaries.
- There are early surrender penalties in the first 3 years.

## Risks

The value of a With-profits investment can fall as well as rise, so the child could get back less than you invest, especially over the short term. Your Junior ISA should be seen as a medium to long term investment.

There is a risk that a market value reduction will be applied to your policy which means that the child might get back less than you have invested if you withdraw from your investment at any time other than on one of the capital and bonus guarantee anniversaries.

## Bonuses

With-profits investments grow through the bonuses that are added to the investment. The Society aims to provide a consistent return by smoothing bonuses to avoid volatile fluctuations in the value of your investment. When a reversionary bonus has been added to your bond it can never be taken away. The level of reversionary bonus can change every year and in exceptional circumstances can be nil. Between reversionary bonus declarations we add an interim bonus to your investment and if you were to transfer the Junior ISA we might also add a terminal bonus. Terminal and interim bonus rates can change and unlike reversionary bonuses are not locked in.

Previous bonus rates should not be seen as a guide to future bonus rates.
